

EMVCo uses independent security evaluation laboratories to perform security evaluations for the purpose of verifying that ICs or IC cards perform according to EMVCo Security Guidelines.

EMVCo recognizes two types of evaluation laboratory:

- Full service laboratory

A laboratory that has demonstrated full conformance and full capability in all identified laboratory technical requirements of EMVCo.

- Specialist laboratory.

A laboratory that has demonstrated full conformance and full capability in a set of identified (as indicated in the table below) laboratory technical requirements of EMVCo.

The following laboratories have been recognized by EMVCo. Product providers requiring EMVCo Security Evaluation of their products should use these recognized laboratories.

Laboratory	Location	Full Service Laboratory	Specialist Laboratory
Serma Technologies	Pessac, Cedex, France	✓	—
