Certificate

Certification Scheme

The certification body of TÜV Informationstechnik GmbH performs its certifications on the basis of the following certification scheme:

- German document: "Zertifizierungsprogramm (nicht akkreditierter Bereich) der Zertifizierungsstelle der TÜV Informationstechnik GmbH", version 1.0 as of 2015-08-24, TÜV Informationstechnik GmbH

Audit Report

- German document: "Auditprotokoll – Sicherheitsaudit", version 1.1 as of 2017-10-16, audit ID S/09112912, TÜV Informationstechnik GmbH

The audit was performed at the site 86650 Wemding, Germany.

Audit Requirements

- "DeTeCardService/TÜViT TU4 – Requirements for Security Management Systems", Version 2.0 as of 2001-09-01

The following requirements of the TU4 criteria are not applicable for the present security management system in scope:

- 4.2 Production Run
- 5.3.2 Separation of High Security Areas from the other Network Environments
- 5.8 Development Environment

Audit Target

- The target of the audit is the security management system for the storage of security labelling systems at company FDSV UG, 86650 Wemding, Germany.

Audit Result

- The certification confirms that the audited company has installed for the audit target a security management system according to DeTeCardService/TÜViT TU4 and utilizes it.
- The audit target fulfils all applicable audit requirements.

Summary of the Audit Requirements

1 Responsibility of the Top Management

The top management is responsible for the definition and documentation of the security policy.

2 Administration

The security representative is responsible for the administration of the security management system.

3 Staff Security

For all security relevant tasks only trustworthy and accordingly qualified staff are to be employed.

4 Material Flow

Adequate security measures are to be defined for single materials, (intermediate) products, data and documents in the production.

5 Security in the Information Technology (IT)

Confidentiality, integrity, authenticity and availability of all production and personalising data in all phases have the highest priority.

6 Passive Security Requirements

Passive building security measures must have a suitably structured order and resistance quality to represent an effective physical hindrance for potential attackers on their attack path.

7 Active Security Requirements

In order to recognise an attack if possible in the formation phase, active elements for access control and alerting are required.

8 Auditing (external)

In general the auditing is carried out on the basis of the current valid version of the TU4.
